Summary

Problem solver and artist, able to learn fast and self-motivated. I build full-stack web apps while focusing on UI and Design. I take ideas from conception to completion using the MERN stack and the React.js framework. I aim for aesthetically meaningful visual experiences, which is what I am mostly concerned about when building UI. Below you'll find projects I've completed that showcase my skills and general background. View my work at jrdeveloper.me.

Experience

Crown Clothing

- September 2019

[Open](#) 

Space Visualizer

- July 2019

[Open](#)
